2017 | Foundation Republic
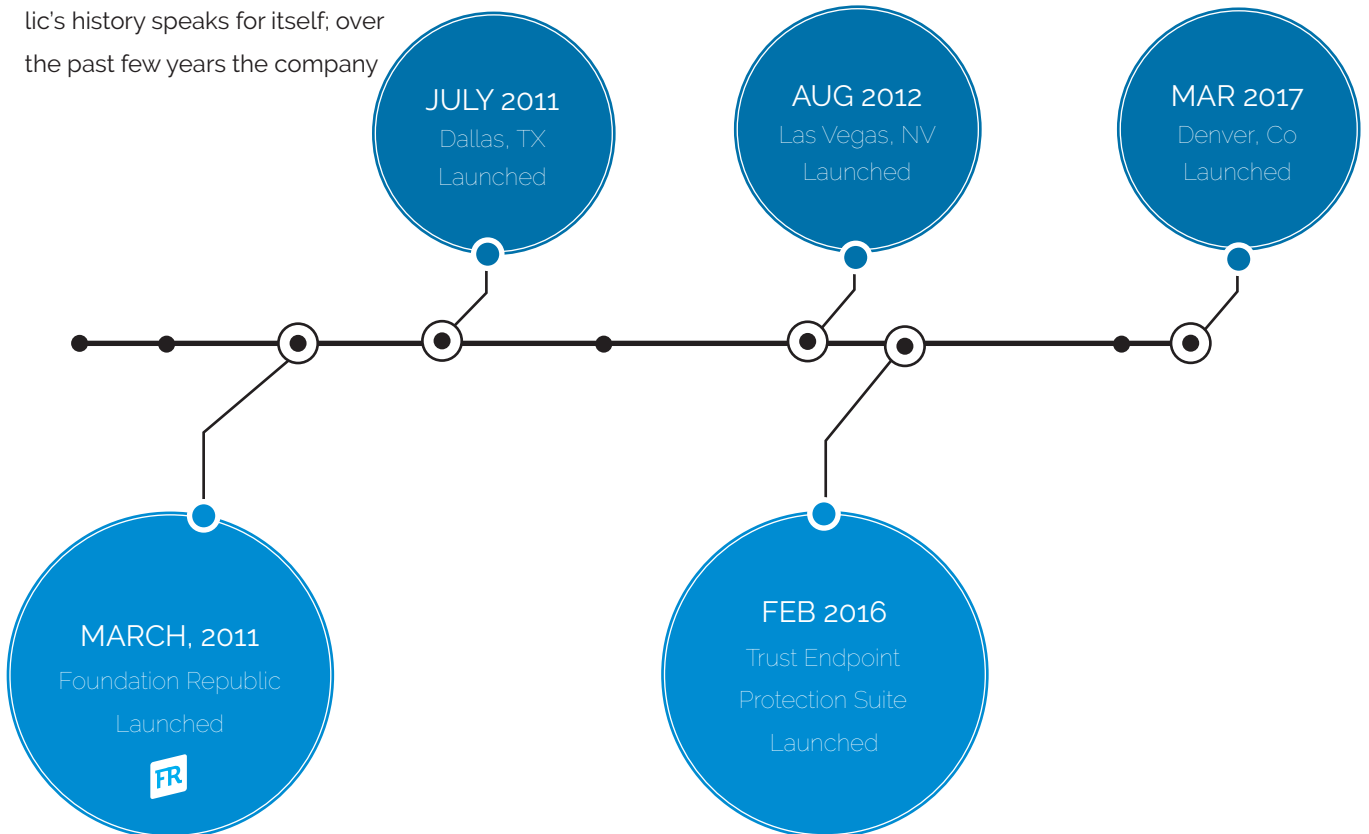

Secure by Default

[Our milestones
its the little things]

We are where you need us.

Launched in early 2011 by a couple of brave, some would call crazy - Enterprise IT evangelists that were bound and determined to build a company that provides the very best service in the industry, Foundation Republic was born. Foundation Republic's history speaks for itself; over the past few years the company has grown to be one of the market leaders in the MSSP (Managed Security Service Provider) market. Understanding technology is simply not enough these days. The modern threat landspace is ever evolving, which has a direct impact on every size business. Our team is here to help lessen these burdens to enable your business to operate at its peak, day in, day out.

secure by default.

Ninja Style or Ninja Rap?

From helping you manage your endpoints to routing global traffic over a new OSPF network, we have you covered.   With our award winning **Trust Endpoint Protection Suite**, our ninja's are some of the most effiecient geeks you've ever seen! From our cloud-powered control panel, we are able to administer your entire environment with ease.

ENDPOINT PROTECTION

As an extension to our managed security offering, your endpoints are covered from here on out! Powered by our Trust Endpoint cloud based platform. Subscribe to what you need! No minimums to get started.

SMART BENCH*

Do you have a project that you need a hand with? Foundation Republic's extensive *"Smart Bench"* with technology ninja's are ready to help!

COMPLETE FIREWALL MANAGEMENT

Managing firewalls to deliver the best performance can be a very complex and daunting tasks for many IT professionals. By leveraging our team's specialized security expertise, you can offload those tasks to our specialists. Our team will properly deploy, manage, upgrade and patch firewalls to keep you protected at all times. As an extension of our managed security offering, you will be covered, while our team applies any new security rules or specific updates to your environment as soon as they become available.

DATACENTER SOLUTIONS

Organizations with little in-house IT security expertise can leverage our Datacenter services to develop well secured systems, applications. Foundation Republic offers a full range of DataCenter Security services including colocation, bandwidth and consulting.

3

Foundation Republic - Endless Capabilities

VIRTUALIZATION

From Project implentation to ongoing support we have you covered, no matter if you are running Hyper-V, VMware or even Open Stack, our Ninja's love it all!
STORAGE SOLUTIONS

Your data storage requirements are growing exponentially and a scalable comprehensive solution for backup, storage, and data protection is critical. Implementing and managing this necessary storage infrastructure to meet both your application and compliance requirements can be extremely time consuming and costly. We can help by hosting you replicated data and assisting you with selecting new storage solutions.

SMART PRE-SALES BENCH*

We are here to help make your technology buying decsion easier and safer. Get a backup opinon from our Pre-Sales Smart Bench.

COMPLETE MANAGED SECURITY

Don't be the next case study; Combat the speed and sophistication of would-be attackers. As one of the leaders in security, we can help you prepare, recognize cyber-attack trends, and, when necessary, respond quickly to contain the effects.

Let's start this relationship on the right foot.

Many providers start with performing a threat assessment. It's a logical start considering the complex nature of technolgy. A technology "widget" can be implemented a 1000 differnet ways, and 999 of them being a default/insecure method. We also start with a threat assessment, but the key differentiator is that our Cyber Threat Assessment is 100% complementary, and 100% safe to run in your environment.   We collect 3 days worth of data and you get a fancy, data filled threat report. From this data we can set a baseline to see where we can help you secure and support your business.

. . .we speak this language, & check out our super rad reports.

Security and Threat Prevention
High Risk Applications

The FortiGuard research team assigns a risk rating of 1 to 5 to an application based on the application behavioral characteristics. The risk rating can help administrators to identify the high risk applications quickly and make a better decision on the application control policy. Applications listed below were assigned a risk rating of 4 or higher.

High Risk Applications

#	Risk	Application Name	Category	Technology	User	Bandwidth	Session
1	5	Hola.Unblocker	Proxy	Client-Server	12	14.49 MB	5,927
2	5	Neurevt.Botnet	Botnet	Client-Server	2	1.80 MB	4,290
3	5	Hotspot.Shield	Proxy	Client-Server	4	1.44 MB	2,521
4	5	Paros.Tool	Proxy	Client-Server	3	25.82 MB	1,680
5	5	ZenMate	Proxy	Browser-Based	16	4.68 MB	1,644
6	5	Private.Tunnel	Proxy	Client-Server	12	1,003.74 KB	1,548
7	5	Tor	Proxy	Client-Server	19	357.25 MB	1,031
8	5	Proxy.Websites	Proxy	Browser-Based	13	2.52 MB	556
9	5	CyberGhost.VPN	Proxy	Client-Server	6	12.51 MB	296
10	5	Freedome	Proxy	Client-Server	14	13.78 MB	210

"Foundation Republic's Cyber Threat Assessment program is a breath of fresh air in a complex and confusing technology space." - JBM Supply, Houston TX.
